## EXPERIENCE

### Temporary Support Technician, Shelter Insurance

July 2025 - PRESENT

Restructured inventory management system, assisted in the ticketing system while helping end users and prepping bash scripts for admins.

### Esports Management, Columbia College

July 2024 - August 2025

Created independent programs to better run teams effectively like proper calendar and worked with sponsors for events of 100+ people.

### Data Analyst, Columbia College

March 2023 - April 2024

Worked in SQL and Javascript while working to restructure the current database system to a more modular system.

## EDUCATION

### Computer Science, Bachelors — Columbia College

DECEMBER 2023 - AUGUST 2025

### Associates — MACC

## PROJECTS

### Pokemon Bot Project — Raspberry PI Pico/C++/HTML/Python

Uses C++ and a pico to connect to a gamecube controller to play any game that accepts gamecube inputs and uses python visual libraries to confirm different gamestates.

### Custom Pokemon Event Wii Game — Assembly/C++/C#

Uses Assembly and C++ to check if a gameboy is plugged in then uploads event data.

### AI Yugioh Player — GPT-4/Python/C++

Uses AI database of yugioh decks to optimize for the perfect plays online.

## Accomplishments

Hosted Events with over 100+ people.

Worked with sponsors local and worldwide to obtain monetary incentives for events. Totaling a couple thousand dollars in estimated value.

Successfully coached the Smash Bros team in esports to a top 8 regional finish on its inaugural year.
